

# SCHOOLS *for* CLIMATE ACTION

## *Who We Are...*

We are a non-partisan, grassroots, youth-adult campaign with a mission to empower schools to speak up for climate action in order to protect current and future generations.

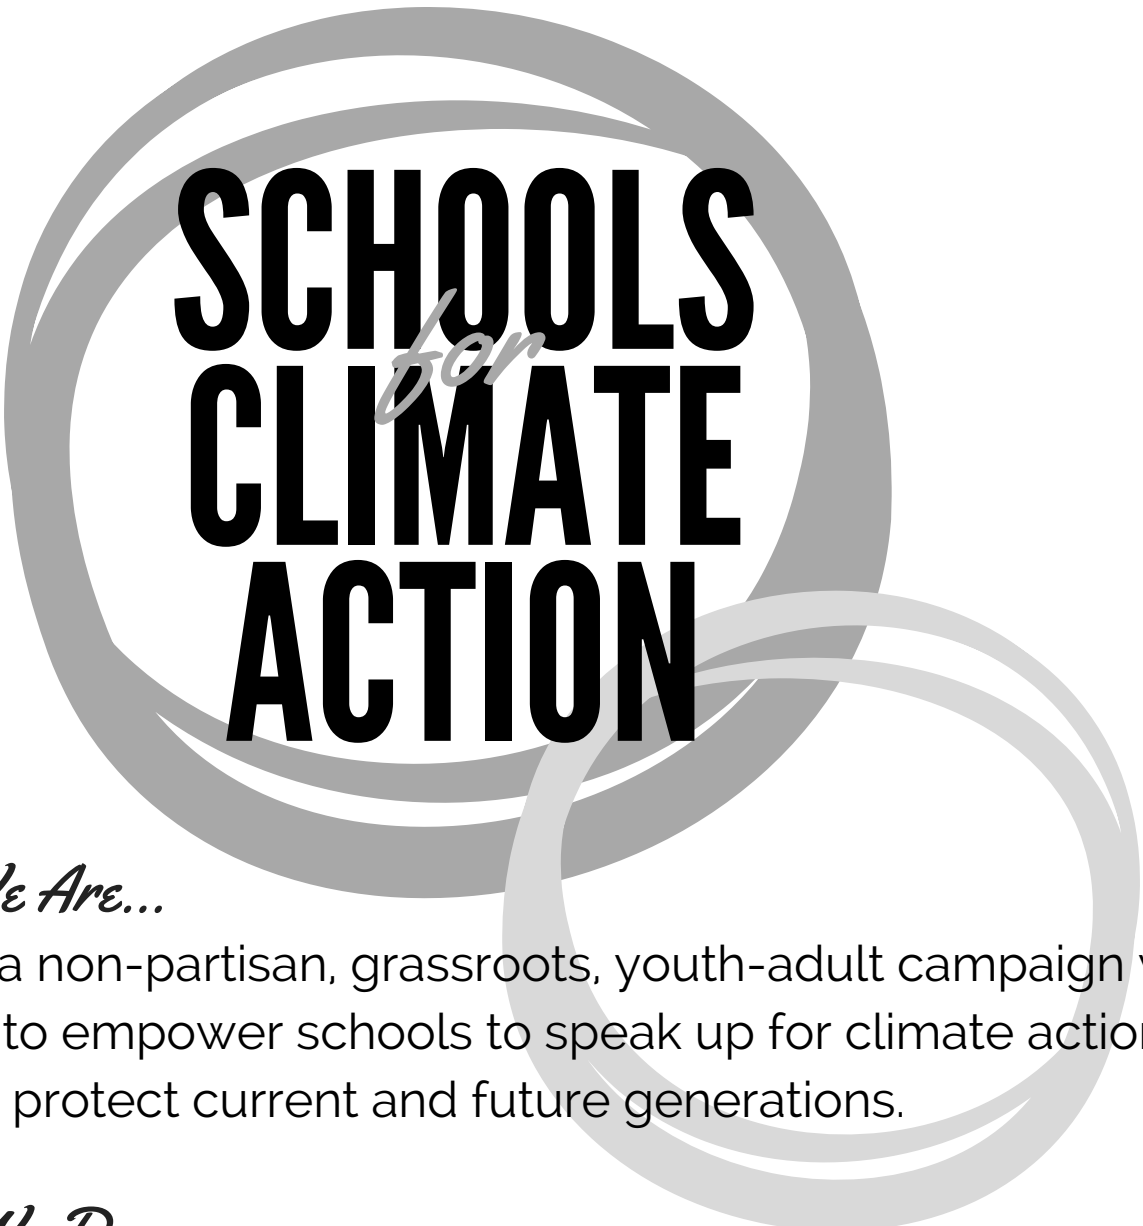

## *What We Do...*

We help school boards, student councils, PTA's, and teacher's unions to pass resolutions that do 3 things:

- Drive a paradigm shift so people recognize climate change as a generational justice issue.
- Clearly articulate the political will for all elected leaders to support or enact common-sense climate policies (such as national carbon pricing).
- Celebrate and expand school district responses to climate change.
